Allowable Subject Matter

Claim 1, 3-10, 12-17 are allowed.

Claims 2 and 11 are cancelled, See remarks dated 5/5/2007 for claim 2, and remarks page 11 dated 12/6/2007 for claim 11.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The cited prior arts do not teach or suggest providing a plurality of animated graphic files, each animated graphic file depicting a unique contest between at least a first entity representing a first product and a second entity representing a second product; associating each animated graphic file with at least one unique numeric range that collectively comprise a substantially continuous numeric scale; determining a first product value representing the first product's performance on a test; determining a second product value representing the second product's performance on the test; solving for a numeric contest value by mathematical relationship between the first product value and the second product value; determining which numeric range includes the contest value; selecting the animated graphic file associated with the numeric range which includes the contest value; and, displaying the selected animated graphic file, as recited in independent claims 1, 12 and 14. The dependent claims 3-10, 15-17 are allowed with similar reasons as set forth in independent claim 1, above.

Regarding claim 13: the cited prior arts do not teach or suggest determining a first product value representing a first product's performance on a test; determining a second product value representing a second product's performance on the test; adding the first product value to a

database of other product values of other product performances on the test; adding the second product value to the database of other product values of other product performances on the test; determining a statistical numerical representation of the database; solving for a first product base value between the first product value and the statistical numerical representation; solving for a second product base value between the second product value and the statistical numerical representation; solving for a numeric contest value by mathematical relationship between the first product base value and the second product base value; determining which numeric range includes the contest value; selecting the animated graphic file associated with the numeric range which includes the contest value; and, displaying the selected animated graphic file, as recited in independent claim 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
